(610) 731-3514 | ras709@pitt.edu | github.com/worldofrs | linkedin.com/in/raima-saha-

EDUCATION

UNIVERSITY OF PITTSBURGH

PITTSBURGH, PA

BS: Computer Science, Digital Narrative and Interactive Design (GPA: 3.97/4.00)

Expected Graduation: Apr 2028

- Courses: Data Structures and Algorithms 1, Intermediate Programming, Linear Algebra.

SKILLS

Frontend: JavaScript, HTML, CSS, React, responsive UI, browser DevTools debugging

Backend/Data: Python, SQL, REST APIs, HTTP/JSON, data validation/cleaning (pandas, NumPy)

Databases: Postgres (Supabase) and relational concepts, SQLite

Tools/Workflow: Git, GitHub, documentation, iterative delivery, Docker, Google Cloud Run, CI/CD

AI-assisted Development: Claude Code

PROJECTS / HACKATHONS

LeetCode Legends – Full-Stack Web App | Next.js, React, ClaudeAI API, Docker, SQLite | [GitHub](#)

Berwyn, PA

Personal Project

June 2026

- Built a full-stack LeetCode study dashboard that syncs submission data via LeetCode's GraphQL API, schedules problem reviews using the SM-2 spaced repetition algorithm, and generates personalized daily study plans by analyzing per-topic failure rates across 6 database tables
- Integrated an AI tutoring system using Anthropic Claude with 6 custom tool-calling functions, enabling the model to query real user data before responding, and containerized the application with a multi-stage Docker build for deployment on Google Cloud Run

Swole.ai – Full-Stack Web App | React, JavaScript, Supabase, Auth0 | [GitHub](#)

Pittsburgh, PA

TartanHacks 2026

Feb 2026

- Built a database-backed web app with authentication and core user workflows; implemented UI components and data-driven flows.
- Debugged integration issues across auth, database reads/writes, and UI state; stabilized key journeys for a demo-ready release.

GlassSlipper.ai -- Image Analysis Tool | AWS, Amazon Rekognition, OpenAI, Python, Git | [GitHub](#)

Pittsburgh, PA

SteelHacks 2025

Sep 2025

- Built a Python service integrating external APIs to transform raw inputs into structured outputs; improved reliability via schema tightening and edge-case handling.
- Documented failure modes and fixes to make downstream behavior predictable for the frontend and users.

WORK EXPERIENCE

Coded by:

Philadelphia, PA

Web Development Intern

June 2026 –

Present

- Ideated and validated various problems and solutions that solutions would be adept to solve in a fast paced environment.
- Worked in a team of 3 to develop a startup, creating an MVP and curating a pitch deck to present to potential investors at Zero Vector Ventures.

Itinera: Historical Travel and Digital Humanities

Pittsburgh, PA

Undergraduate Research Assistant

Jan 2026 – Apr 2026

- Maintained data quality through validation and normalization steps; documented changes to keep datasets consistent over time.
- Produced stakeholder-ready visual outputs and communicated updates clearly in written documentation.

Pitt Business FinTech Lab

Pittsburgh, PA

- Translated requirements into user flows and structured deliverables; collaborated in iterative cycles and documented decisions/changes.
- Clarified edge cases with teammates to keep execution aligned and maintainable.
